DEEP ANALYSIS — VISUAL THINKING

1:20-2:20 · MAGIC LENS

MAGIC LENS

Point me at any health document.

A letter from your doctor, a vaccination card, lab results, a pill box... I will read it, explain it in simple words and file it into your Life Card. No typing.

OPEN CAMERA

CHOOSE A PHOTO FROM GALLERY

The photo is analyzed by Guardian AI and saved only if you say YES.

2:20-3:00 · FALL DETECTION

GET HELP NOW

FALL DETECTED

1:59

UNTIL THE ALARM IS SENT

SAY: "I AM OK!"

I'M OK

1. Home -> tap the glowing orb

2. Tap orb -> speak: "What's on my health timeline this year?"

3. Jarvis answers OUT LOUD (Onyx)

4. Tap SONAR -> live web search

5. Hands-free: just say "JARVIS"

-- wake-word opens the mic
1. Home -> gold MAGIC LENS tile

2. OPEN CAMERA -> aim at any medical paper -> shutter

3. AI reads it (~5 s): "This looks like a lab result -- save it?"

4. YES -- SAVE IT -> OPEN LIFE CARD: entry is on the timeline
- Prep: Profile -> Fall Guard ON

1. Real physics: 80 ms free-fall + 2.5 g impact (no shake trick)

2. Drop phone ~30 cm on cushion

3. Red screen: countdown + voice check ("I am OK!") + I'M OK

4. No answer -> SOS + GPS to circle

HOME — orb + Magic Lens tile

WHY IT MATTERS (30-second pitch)

- Voice-first: seniors never navigate menus — they talk to Jarvis (wake-word, TTS answers, 14 languages).
- One-photo records: Magic Lens turns any medical paper into a plain-language Life Card entry. Zero typing.
- Acts when you can't: accelerometer fall detection -> voice check -> automatic SOS + GPS to the Guardian Circle.
- Sovereign by design: DID-signed documents, zero-knowledge vault, GDPR Art. 9, EU AI Act Art. 50 labelling.

BACKUP PLANS

Slow Wi-Fi -> typed chat instead of voice · Camera issue -> CHOOSE FROM GALLERY (pre-loaded photo) · Fall demo re-run -> wait 30 s cooldown · Jarvis/Fall need a real phone (Expo Go QR) — web preview shows UI only.
